The 2nd AMR International Symposium in Anatomic Pathology

The 2nd AMR International Symposium in Anatomic Pathology will be held this year in Srní, the Czech Republic, a winter resort town at the border with Germany (50 miles from Passau). The symposium will take place at the Hotel Šumava. The format of the symposium will be a combination of lectures and an extended slide seminar presented by members of the AMR International Pathology Slide Club. A total of approximately 50 selected cases will be presented with an opportunity for questions and answers from the audience. Plenary lectures on various topics of interest in pathology will also be presented by the faculty. Sets of glass slides will be distributed to the first 80 registrants and a handout containing the didactic material from all the presentations will be distributed to all the participants on CD-ROM disc. The symposium will focus mainly on diagnostic problems and controversies in surgical pathology and should be of interest to general surgical pathologists and trainees in the specialty (residents / registrars). Because of the limited capacity of the auditorium, registration will be limited to 350 attendees. **Attendance for individuals outside of the Czech Republic will be limited to the first 80 pathologists who register.**

Srní

Srní is located approximately 190 km from the international airport in Prague. Transportation to and from the airport or other locations is the responsibility of the attendees; transportation will not be provided by the organizers. Taxi transfer is recommended as the best way to reach Srní from Prague. Average cost for Taxi transportation from Prague to Srní is approximately 150-200 Euros.

Arkadi M. Rywlin, MD

The AMR International Pathology Slide Seminar was founded by Prof. Suster in 1991 to honor the memory of his teacher and mentor, the late Professor Arkadi M. Rywlin (1923 - 1987). Professor Rywlin was born in the free city of Danzig, and completed his medical degree at the University of Geneva, Switzerland. He immigrated to the United States in 1953 and after additional training with Otto Saphir in Chicago, eventually transferred to the Mount Sinai Medical Center of Greater Miami in Miami Beach, Florida. There he served as the Director of the Department of Pathology & Laboratory Medicine and Professor of Pathology at the University of Miami School of Medicine until his untimely death in 1987.

Professor Rywlin attained international recognition for his expertise and numerous publication in the pathology of the bone marrow. He was the author of more than 100 articles spanning a variety of subjects in pathology and achieved international recognition with the publication of his textbook on Histopathology of the Bone Marrow (Little, Brown & Co, Philadelphia, 1974). Professor Rywlin was an outstanding educator and trained hundreds of residents and fellows. He combined a classical education in pathology with a strictly logical, straightforward approach to solving problems in pathology. The Club was founded by Dr. Suster to honor the memory of this Master of Pathology and to celebrate and promote the spirit of critical thinking that was the legacy of Professor Rywlin to his students.
