AMR SEMINAR #80

June 27, 2025.

Dear Friends and Members:

Greeting from the AMR Slide Seminar Club. Attached please find the new set of cases with their case descriptions. A set of slides has been mailed under separate cover. Comments to the previous cases and the case histories for this submission are on the official AMR web page <http://www.amr-seminar.org>.

The deadline for submission of cases for the next seminar will be **November 1st, 2025**.

The following members are due for submission of cases for the next seminar:

*Volkan Adsay
Fatima Carneiro
Masaharu Fukunaga
Chris Hartley
Michael Michal
Vania Nose
Tiziana Salviato*

*Justin Bishop
Hugo Dominguez
Barbara Gazic
Ricardo Lastra
Markku Miettinen
Delia Perez Montiel*

*Greg Charville
Franco Fedeli
John Gross
Thomas Mentzel
Cesar Moran
Raul Perret*

I am pleased to share with you the conclusion of the 13th International AMR Symposium in Anatomic Pathology that was held at Plsen, the Czech Republic on June 16-18, 2025. The meeting was a great success thanks to the efforts of Michael Michal and his father, and the local organizing team. I took the opportunity to formally hand over to my son, David Suster, the organization of the slide seminars. From now on, he will be responsible for the organization of the club and any international meetings. As a result of the inquiry in my previous communication, I received an overwhelmingly positive response by the majority of the members regarding the question of transitioning to scanned slides instead of the usual exchange of glass slides. We are still working out the details of how the slides will be scanned (i.e., individual responsibility vs. centralized scanning of cases). We will notify you by email once the issue is resolved.

I would like to state again that it has been my privilege and one of the highlights of my career to coordinate this activity for so many years. I am eternally grateful for the support, enthusiasm and commitment demonstrated by all the members of the Club over the years. But it is now time to hand the reins over to the new generation. Hopefully they will be able to continue cultivating the tradition of morphologic surgical pathology for many years to come and in this way continue to honor the memory of one of its masters, Arkadi M. Rywlin.

With very best wishes and kindest regards,

Saul Suster, M.D.
